## Accessories for TD measurement transformers

### TD-Cover

#### Description

Accessories for sealing TD series current transformers. The TD-Cover kit consists of a transparent cover that is placed at the top of the transformer, disabling access to the secondary connection terminals, and it can be sealed to avoid any manipulation. **It also includes two caps that can be used in any TD series model to avoid access to the secondary terminals that remain unconnected after connecting the measurement devices.**

### DIN-Fix

#### Description

Accessory for installing TD transformers to DIN rail. We can bidirectionally fix the device to a DIN rail with just this accessory, as it provides the possibility of fixing it either horizontally or vertically.

Accessory for fixing TD4, TD5 and TD6 models to a 50x50 DIN rail.

Accessory for fixing the TD8 model to a 50x84 DIN rail.
